DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 5 and 6, drawn to a means for generating a random series of M bits by using prime numbers, rearranges bits in the random series and writes the random series in each of N rows x M columns, where N and M are natural numbers, to thereby generate N random series, **wherein the bits in each of the N rows are rearranged in such a manner that non-identical bits are placed in same column of adjacent rows.**

Group II, claim(s) 3, 4, 7 and 8, drawn to a means for generating a random series of M bits by using prime numbers, rearranges bits in the random series and writes the random series in each of N rows of a buffer of N rows x M columns, where N and M are natural numbers, to thereby generate N random series, **wherein the bits in each of the N rows are rearranged in such a manner that a particular bit in a particular row is shifted by one column from the particular bit in an adjacent row of the particular row.**

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: rearrangement of bits in each of the rows is performed using different algorithms.

A telephone call was made to Chad Billings on 27 September 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph D. Torres whose telephone number is (703) 308-7066. The examiner can normally be reached on M-F 8-5.
